

Goals for the end of the week

- 01 Environment already set up and working (VS Code, GitHub, Claude or Codex or open source models running and responding, generating code)
- 02 Specification, architecture written and first feature started and implemented, tested (we do together on Thursday)

Project Brief: Bootcamp Connect

Two groups of people are learning side by side: software developers and business developers. Each group has something the other needs. Your task is to build a platform that brings them together. It might spark a co-founder partnership, a collaboration, a friendship, or something more. How you interpret "connection" is up to you.

You can be flexible with the project brief, provided the essential items are covered.

Essential functionality

- **Registration and login:** users sign up, choose which course they're on, and manage their account.
- **User profiles:** photo, bio, skills, interests, and what they're looking for.
- **Search and matching:** find people by filters, a matching algorithm, or both. Show why two people might be a good fit.
- **Messaging:** private conversations between users.
- **Admin screens:** manage categories, skills, interests, courses and users.

Suggested additional features

- **Connection requests:** users can express interest, and a conversation only opens if both agree.
- **Favourites or shortlist:** save profiles to come back to.
- **Notifications:** alerts for new matches, messages and requests.
- **Safety tools:** block and report users, plus an admin moderation queue.
- **Privacy settings:** control who can see your profile or contact you.
- **Events or meetups:** post and join pitch nights, hack days or socials.
- **Project ideas board:** business students post ideas and developers express interest, or the other way round.
- **Dashboard stats for admins:** sign-ups, matches made and active conversations.
- **Account deletion and data export:** a nod to GDPR.

Stretch goals

- AI-assisted matching or icebreaker suggestions.
- Real-time chat.
- A mobile-friendly design.
